

A smarter perspective on ship power solutions

In this issue of WinGD Xtra we share highlights from our recent Engine Builders Conference held in May in Switzerland, with the theme of 'Powering Transformation'. Collaboration is key to reaching our decarbonisation goals, as exemplified both at the conference and through a landmark MoU signed between WinGD, Alfa Laval, ABS and K Shipbuilding.

We also bring you more insights from our experts and the latest documents published on our website, where you'll find the latest updates and guidance for WinGD's ammonia- and methanol-fuelled engines.

TRANSFORMING PARTNERSHIPS

WinGD's Engine Builder Conference, Lucerne, Switzerland

At a gathering on the shore of Lake Lucerne, WinGD hosted its engine builder partners at the global conference in May. Under the theme of Powering Transformation, the three day conference covered a look ahead at the market, the suite of products and services in WinGD's complete orchestra of solutions and the technology advancements that will enable the energy transition in shipping.

During the opening of the first day of the event, our guests had the opportunity to hear a message from a special guest. [Click here to watch.](#)

X52-S2.0 successful type approval test

A successful test campaign for our new 52-bore short-stroke engine highlights the competitive advantages of its compact design, unparalleled fuel efficiency and emissions performance. With confirmed orders for methanol, LNG and diesel configurations, this small but mighty addition to our portfolio has already been well received by the market.

WinGD, Alfa Laval, ABS and K Shipbuilding join forces for ammonia-fuelled tanker design

WinGD, Alfa Laval and (ABS) will work with Korean shipbuilder K Shipbuilding (KSB) on the development of an ammonia-fuelled MR tanker design, under a memorandum of understanding signed in April.

TradeWinds Shipowners Forum - Posidonia

Photo courtesy of TradeWinds

Dominik was invited to join a panel titled *Net Zero vs Net Income* at this year's Shipowners Forum hosted by TradeWinds.

Read Dominik's perspective on how new fuel-ready notations from classification societies are too vague and too varied among other challenges at play in the road to carbon-free shipping.

Our Experts were on hand at Posidonia

Our team was at this year's Posidonia in Athens. During the exhibition, we hosted the 'Meet the Xperts' event on our stand, with an ensemble of technology specialists and innovators on hand to share how we compose vessel-wide energy ecosystems to advance fleet efficiency and digital optimisation.
